

Samuel Scheit

Software Engineer | Full-Stack, React Native & Performance Engineering

Munich, Germany | +49 160 97788689 | contact@samuelscheit.com | samuelscheit.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software engineer with commercial delivery experience across high-performance mobile applications, WebGL video rendering, full-stack SaaS, and real-time systems. Delivered product engineering for PHONT, Exodus, and MyroDex; founded Spacebar (6.7k+ GitHub stars) and built developer tooling with 222k+ npm downloads in 12 months. The project history below includes every project named in the full CV.

EXPERIENCE & VENTURES

Freelance Software Engineer

2025-2026

Selected client engagements

- **PHONT (2025; month not recorded)**: Re-engineered a WebGL/FFmpeg video-export pipeline from real-time capture to deterministic frame-by-frame rendering, improving export speed by up to **50x in project benchmarks**.
- **Exodus (2025; month not recorded)**: Delivered performance-sensitive gestures, animations, and product flows across Exodus Mobile and Grateful using React Native, Reanimated, Skia, and native iOS/Android integration.

Founder & Engineer | Spacebar Chat

Jan 2021-present

- **MyroDex (2026; month not recorded)**: Founded and built a multi-tenant esports operations SaaS end to end across customer and back-office apps, organization RBAC, workflows, Stripe billing, background workers, automated tests, and a production deployment workflow.
- Founded a self-hostable, Discord-compatible chat, voice, and video platform whose flagship repository reached **6.7k+ stars and 220+ forks**; the ecosystem spans HTTP APIs, WebSocket/WebRTC, CDN/media delivery, data models, administration tooling, and clients.

Founder & Engineer | Respond

Jan 2022-present

- Founded a multi-platform messaging initiative uniting WhatsApp, Telegram, Discord, and Fosscord/Spacebar in one client experience; built supporting React Native, Rust, and JSI runtime infrastructure.

Open-Source Contributor / Maintainer | Trant Labs

Jan 2021-Nov 2024

- Contributed features, releases, documentation, and CI/CD to [missing-native-js-functions](#), a zero-dependency JavaScript utility library.

Independent Software Developer

From Jan 2018

- Built the [GyKi](#) school app for timetables, substitution plans, and appointments; created the historical [Discord Bot Client](#) (695 stars / 390 forks) and Discord bots for commissioned work.
- Built an early database-backed server-management application and developed a foundation in C, Linux, HTML/CSS, PHP, and SQL.

PROJECTS

Puppeteer Stream | Creator & Maintainer

Dec 2020-present

- Created and maintains a TypeScript browser audio/video capture library for Puppeteer with **222k+ npm downloads** in the 12 months ending August 2026, **459+ GitHub stars and 131 forks**.

React Native Skia List | Creator

Oct 2024-present

- Built a Skia/C++ virtualized list that rendered 1,000 items **up to 10x faster** than existing react-native list rendering solutions with **about 70% fewer dropped frames**; 240+ GitHub stars.

Phishing Support | Creator

Jan 2026-present

- Built an open-source tool for automated analysis, reporting, and tracking of phishing emails and malicious websites, including indicator extraction, automated checks, and abuse/takedown workflows.

Bundestagswahl 2025 | Independent Data Analysis

Feb 2025

- Built and published a TypeScript/Bun data pipeline and interactive map covering all 299 German federal-election constituencies; documented the methodology in a public article.

Browser Fingerprinting Technical Analysis | Co-author

May 2024-present

- Co-authored a FingerprintJS-based technical analysis; developed a custom fingerprinting library and dataset to evaluate identification methods, limitations, and countermeasures.

WPlace World Archive | Creator

Aug 2025-present

- Built a C++/Linux system to scrape, archive, process, and visualize the entire wplace.live map with tiled storage, VIPS lower-zoom generation, and full-world jobs.

Spotify DRM Report | Independent Technical Research

May 2025 (report 2023)

- Published a proof-of-concept report on a reported missing-DRM-enforcement issue in Spotify's Accesspoint API; no CVE, bounty, or vendor outcome is claimed.

Team Checkmate / Hackatum 2024 | Systems Challenge

Nov 2024

- Co-built a high-concurrency Go REST backend for Check24's car-rental challenge using SQL optimization, in-memory bitmap filtering, B-trees, and fasthttp.

Upstream Mobile & Native Contributions

Sep-Oct 2024

- Landed [React Native Skia iOS ProMotion 120 Hz](#) support, originated its [macOS Catalyst approach](#), and added iOS support to [jsi-rs](#) for Rust/JSI interoperability.

TECHNICAL WRITING

Jul 2023 - Using Rust in React Native with [jsi-rs](#); Oct 2024 - Implementing the fastest list renderer for React Native; Feb 2025 - [Fehlende Stimmen bei der Bundestagswahl 2025?](#)

SELECTED ADDITIONAL PROJECTS

Curated from my own repository history and limited to projects that demonstrate meaningful engineering work. Dates use each repository's creation month; summaries focus on recruiter-relevant engineering scope.

[npm-malicious-check](#) (private) | Creator - supply-chain security tooling

May 2026

- Built a Python triage utility that downloads npm malware advisories, normalizes them to CSV, and scans local npm, Bun, and Yarn caches for package/version matches.
- Designed the workflow to give developers and incident responders a fast, auditable first check after a supply-chain incident.

[react-native-skia-yoga](#) | Creator - React Native rendering prototype

Jul 2025

- Developed a C++/TypeScript library combining Yoga layout with React Native Skia for declarative, interactive UI rendering.
- Built the JSX intrinsic-node surface and example integration for complex layouts, while documenting the project as an early-stage prototype rather than production software.

[holistische](#) (private) | Founder - AI-assisted news platform

Jun 2025

- Built a private AI-assisted news aggregation product covering German and international reporting.
- Designed the product and publishing workflow around source-based aggregation, structured editorial review, and clear positioning.

[cccb-servicepoint-browser](#) | Creator - browser media integration

Jan 2025

- Built a TypeScript/Bun service that sends text, images, and live Puppeteer browser video to the CCC Berlin Service Point display.
- Connected browser automation and media transport into a small operational display system with explicit commands for each content type.

[jura](#) (private) | Creator - legal text analysis prototype

Apr 2024

- Developed a private legal-text analysis prototype with a parser for German statutes and references, MongoDB-backed data models, and a Next.js interface.
- Added AI-assisted checks for legal content and iterated on grammar, extraction, and judgment-analysis workflows.

gpia (private) | Creator - Android integrity research prototype

Dec 2023

- Investigated Google Play Integrity, SafetyNet, and DroidGuard request flows through a focused protobuf client prototype.
- Applied protocol analysis and binary/API research to document how Android anti-abuse services can be queried from native tooling.

Baileys (private) | Creator - messaging protocol infrastructure

Dec 2023

- Extended a private WhatsApp-compatible messaging stack with native-mobile API support, TCP transport, registration flows, media mappings, CAPTCHA handling, and device/session events.
- Worked across protocol integration, asynchronous connection state, and mobile-specific behavior in a TypeScript runtime.

whatsapp (private) | Creator - private messaging backend

Nov 2023

- Built a private WhatsApp operations backend and dashboard with account authentication, APNs integration, proxy handling, API-key management, and account-event processing.
- Added BullMQ-backed jobs, structured logging, lazy-loaded data tables, and performance-focused API flows for a multi-account service.

missing-native-js-syntax | Creator and maintainer - TypeScript tooling

Jul 2023

- Created a TypeScript transformer and Babel plugin that adds missing JavaScript syntax patterns to existing codebases.
- Packaged the tool for npm with documentation, examples, and automated CI, demonstrating compiler-tooling and developer-experience work.

GykiSpace | Creator - school collaboration platform

Oct 2021

- Built a real-time school collaboration and chat project for the GyKi community, extending the earlier school-app work into a shared communication surface.
- Used the project to explore product design, messaging flows, and self-hosted application development.

Lambert-server | Creator - Node.js server framework

Jan 2021

- Created an Express-based route handler with convention-driven route registration, JSON error handling, and schema-style request validation.
- Published a reusable npm-oriented server foundation designed to reduce boilerplate across small Node.js services.

Lambert-orm | Creator - database abstraction library

Dec 2020

- Designed a database abstraction layer that exposes path-based data access while allowing the underlying database engine to change independently.
- Implemented a MongoDB adapter and a proxy-style API that fetches only the data needed for each operation.

Database-Browser | Creator - web administration tool

Jan 2019

- Built a browser-based PHP/JavaScript/MySQL administration tool for inspecting and editing database contents.
- Delivered an early end-to-end application spanning the LAMP stack, server deployment, tabular data views, and write operations.

TECHNICAL SKILLS

Primary: TypeScript, JavaScript, React, Next.js, React Native, Node.js/Bun

Backend & delivery: PostgreSQL, GraphQL, WebSocket/WebRTC, Docker, Linux, Playwright, CI/CD, Go

Mobile & performance: Skia, Reanimated, JSI/Hermes, iOS/Android, C++, Rust, WebGL/FFmpeg

EDUCATION

Technical University of Munich (TUM) | Informatics studies (no degree) | 2022-2024

Gymnasium Kirchheim | Allgemeine Hochschulreife (Abitur), grade 1.9 | 2022
