

Samuel Scheit

Software Engineer | Full-Stack, React Native & Performance Engineering

Munich, Germany | +49 160 97788689 | contact@samuelscheit.com | samuelscheit.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software engineer with commercial delivery experience across high-performance mobile applications, WebGL video rendering, full-stack SaaS, and real-time systems. Delivered product engineering for PHONT, Exodus, and Myrodex; founded Spacebar (6.7k+ GitHub stars) and built developer tooling with 222k+ npm downloads in 12 months. Selected projects below highlight product ownership, systems work, and developer tooling.

EXPERIENCE & VENTURES

Freelance Software Engineer

2025-2026

Selected client engagements

- **PHONT (Jul-Sep 2025)**: Re-engineered a WebGL/FFmpeg video-export pipeline from real-time capture to deterministic frame-by-frame rendering, improving export speed by up to **50x in project benchmarks**.
- **Exodus (Oct-Nov 2025)**: Delivered performance-sensitive gestures, animations, and product flows across Exodus Mobile and Grateful using React Native, Reanimated, Skia, and native iOS/Android integration.

Founder & Engineer | Myrodex

Mar 2025-present

- Founded and built a multi-tenant esports operations SaaS end to end across customer and back-office apps, organization RBAC, workflows, Stripe billing, background workers, automated tests, and a production deployment workflow.

Founder & Engineer | Spacebar Chat

Jan 2021-present

- Founded a self-hostable, Discord-compatible chat, voice, and video platform whose flagship repository reached **6.7k+ stars and 220+ forks**; the ecosystem spans HTTP APIs, WebSocket/WebRTC, CDN/media delivery, data models, administration tooling, and clients.

Founder & Engineer | Respond

Jan 2022-present

- Founded Respond, a multi-platform messaging app uniting WhatsApp, Telegram, Discord, and Foscord/Spacebar in one client experience; built supporting React Native, Rust, and JSI runtime infrastructure.

PROJECTS

Puppeteer Stream | Creator & Maintainer

Dec 2020-present

- Created and maintains a TypeScript browser audio/video capture library for Puppeteer with **222k+ npm downloads** in the 12 months ending August 2026, **459+ GitHub stars and 131 forks**.

React Native Skia List | Creator

Oct 2024-present

- Built a Skia/C++ virtualized list that rendered 1,000 items **up to 10x faster** than existing react-native list rendering solutions with **about 70% fewer dropped frames**; 240+ GitHub stars.

Phishing Support | Creator

Jan 2026-present

- Built an open-source tool for automated analysis, reporting, and tracking of phishing emails and malicious websites, including indicator extraction, automated checks, and abuse/takedown workflows.

Bundestagswahl 2025 | Independent Data Analysis

Feb 2025

- Built and published a TypeScript/Bun data pipeline and interactive map covering all 299 German federal-election constituencies; documented the methodology in a public article.

Browser Fingerprinting Technical Analysis | Author

May 2024-present

- Authored a FingerprintJS-based technical analysis; developed a custom fingerprinting library and dataset to evaluate identification methods, limitations, and countermeasures.

WPlace World Archive | Creator

Aug 2025-present

- Built a C++/Linux system to scrape, archive, process, and visualize the entire wplace.live map with tiled storage, VIPS lower-zoom generation, and full-world jobs.

- Published a proof-of-concept report on a reported missing-DRM-enforcement issue in Spotify's Accesspoint API.

Discord Bot Client | Creator**May 2020**

- Created a Discord client fork with bot-login support, exposing a bot-oriented client experience that the official application did not provide.
- Built and maintained a widely adopted open-source project with **695 GitHub stars, 390 forks, and 908,716 GitHub release-asset downloads** across its ten published installers.

npm-malicious-check (private) | Creator - supply-chain security tooling**May 2026**

- Built a Python triage utility that downloads npm malware advisories, normalizes them to CSV, and scans local npm, Bun, and Yarn caches for package/version matches.
- Designed the workflow to give developers and incident responders a fast, auditable first check after a supply-chain incident.

Prediction Market Data Platform (private) | Creator - real-time market-data platform**Sep 2025**

- Built a private real-time prediction-market data platform integrating Polymarket and Kalshi HTTP and WebSocket feeds.
- Designed reconnection and subscription logic, a TimescaleDB ingestion pipeline, Docker delivery, and a web application for exploring live orders and event data.

React Native Skia Yoga | Creator - React Native rendering prototype**Jul 2025**

- Developed a C++/TypeScript library combining Yoga layout with React Native Skia for declarative, interactive UI rendering.
- Built the JSX intrinsic-node surface and example integration for complex layouts, while clearly documenting the project as an early-stage prototype.

Holistische (private) | Founder - AI-assisted news platform**Jun 2025**

- Built a private AI-assisted news aggregation product covering German and international reporting.
- Designed the product and publishing workflow around source-based aggregation, structured editorial review, and clear positioning.

Baileys Mobile Protocol Stack (private) | Creator - messaging protocol infrastructure**Dec 2023**

- Extended a private WhatsApp-compatible messaging stack with native-mobile API support, TCP transport, registration flows, media mappings, CAPTCHA handling, and device/session events.
- Worked across protocol integration, asynchronous connection state, and mobile-specific behavior in a TypeScript runtime.

WhatsApp Operations Backend (private) | Creator - private messaging backend**Nov 2023**

- Built a private WhatsApp operations backend and dashboard with account authentication, APNs integration, proxy handling, API-key management, and account-event processing.
- Added BullMQ-backed jobs, structured logging, lazy-loaded data tables, and performance-focused API flows for a multi-account service.

Missing Native JS Syntax | Creator and maintainer - TypeScript tooling**Jul 2023**

- Created a TypeScript transformer and Babel plugin that adds missing JavaScript syntax patterns to existing codebases.
- Packaged the tool for npm with documentation, examples, and automated CI, demonstrating compiler-tooling and developer-experience work.

Pokémon-inspired 2D Game | Creator - Java game development**Feb 2021**

- Built a complete 2D game in Java with the LITengine framework, including game mechanics, assets, and a distributable release.
- Applied object-oriented design and game-engine development in an independently shipped personal project.

Spotify Playback SDK for Node.js | Creator - developer library

Dec 2020

- Created a Node.js wrapper around Spotify's Web Playback SDK to make browser playback capabilities accessible from JavaScript applications.
- Published the library as a reusable developer integration and maintained supporting documentation and example environments.

Carcassonne AI | Creator - AI and game-systems project

Nov 2020

- Designed and implemented an AI for the board game Carcassonne as a school seminar project, supported by a technical paper and playable implementation.
- Explored search and decision-making techniques alongside Python game logic and a visual game interface.

GyKi Mobile App (private) | Creator - iOS school companion

2018; repository archived Apr 2022

- Built a native iOS app for the Gymnasium Kirchheim community, giving students mobile access to timetables and substitution plans.
- Developed the app as part of a broader school-product effort that later included collaboration and communication tools.

Minecraft Server Admin Panel | Creator - self-hosted infrastructure tooling

2017; repository created Jun 2021

- Built a web dashboard for creating and administering self-hosted Minecraft servers, covering operational workflows and server configuration.
- Established an early foundation in Linux-hosted services, PHP, SQL, and browser-based administration interfaces.

TECHNICAL SKILLS

Primary: TypeScript, JavaScript, React, Next.js, React Native, Node.js/Bun

Backend & delivery: PostgreSQL, GraphQL, WebSocket/WebRTC, Docker, Linux, Playwright, CI/CD, Go

Mobile & performance: Skia, Reanimated, JSI/Hermes, iOS/Android, C++, Rust, WebGL/FFmpeg

EDUCATION

Technical University of Munich (TUM) | Informatics studies (no degree) | 2022-2024

Gymnasium Kirchheim | Allgemeine Hochschulreife (Abitur), grade 1.9 | 2022
