

Samuel Scheit

Software Engineer | Full-Stack, React Native & Performance Engineering

Munich, Germany | +49 160 97788689 | contact@samuelscheit.com | samuelscheit.com | [GitHub](#) | [LinkedIn](#)

SUMMARY

Software engineer with commercial delivery experience across high-performance mobile applications, WebGL video rendering, full-stack SaaS, and real-time systems. Delivered product engineering for PHONT, Exodus, and Myrodex; founded Spacebar (6.7k+ GitHub stars) and built developer tooling with 222k+ npm downloads in 12 months. Selected projects below highlight product ownership, systems work, and developer tooling.

EXPERIENCE & VENTURES

Freelance Software Engineer

2025-2026

Selected client engagements

- **PHONT (Jul-Sep 2025)**: Re-engineered a WebGL/FFmpeg video-export pipeline from real-time capture to deterministic frame-by-frame rendering, improving export speed by up to **50x in project benchmarks**.
- **Exodus (Oct-Nov 2025)**: Delivered performance-sensitive gestures, animations, and product flows across Exodus Mobile and Grateful using React Native, Reanimated, Skia, and native iOS/Android integration.

Founder & Engineer | Myrodex

Mar 2025-present

- Founded and built a multi-tenant esports operations SaaS end to end across customer and back-office apps, organization RBAC, workflows, Stripe billing, background workers, automated tests, and a production deployment workflow.

Founder & Engineer | Spacebar Chat

Jan 2021-present

- Founded a self-hostable, Discord-compatible chat, voice, and video platform whose flagship repository reached **6.7k+ stars and 220+ forks**; the ecosystem spans HTTP APIs, WebSocket/WebRTC, CDN/media delivery, data models, administration tooling, and clients.

Founder & Engineer | Respond

Jan 2022-Dec 2024

- Founded Respond, a multi-platform messaging app uniting WhatsApp, Telegram, Discord, and Foscord/Spacebar in one client experience; built supporting React Native, Rust, and JSI runtime infrastructure.

PROJECTS

npm-malicious-check (private) | Creator - supply-chain security tooling

May 2026

- Built a Python triage utility that downloads npm malware advisories, normalizes them to CSV, and scans local npm, Bun, and Yarn caches for package/version matches.
- Designed the workflow to give developers and incident responders a fast, auditable first check after a supply-chain incident.

Phishing Support | Creator

Jan 2026

- Built an open-source tool for automated analysis, reporting, and tracking of phishing emails and malicious websites, including indicator extraction, automated checks, and abuse/takedown workflows.

Prediction Market Data Platform (private) | Creator - real-time market-data platform

Sep 2025

- Built a private real-time prediction-market data platform integrating Polymarket and Kalshi HTTP and WebSocket feeds.
- Designed reconnection and subscription logic, a TimescaleDB ingestion pipeline, Docker delivery, and a web application for exploring live orders and event data.

WPlace World Archive | Creator

Aug 2025

- Built a C++/Linux system to scrape, archive, process, and visualize the entire wplace.live map with tiled storage, VIPS lower-zoom generation, and full-world jobs.

- React Native Skia Yoga | Creator - React Native rendering prototype** **Jul 2025**
- Developed a C++/TypeScript library combining Yoga layout with React Native Skia for declarative, interactive UI rendering.
 - Built the JSX intrinsic-node surface and example integration for complex layouts, while clearly documenting the project as an early-stage prototype.
- Holistische | Founder - AI-assisted news platform** **Jun 2025**
- Built an AI-assisted news aggregation product covering German and international reporting.
 - Designed the product and publishing workflow around source-based aggregation, structured editorial review, and clear positioning.
- Spotify DRM Report | Independent Technical Research** **May 2025**
- Published a proof-of-concept report on a reported missing-DRM-enforcement issue in Spotify's Accesspoint API.
- Bundestagswahl 2025 | Independent Data Analysis** **Feb 2025**
- Built and published a TypeScript/Bun data pipeline and interactive map covering all 299 German federal-election constituencies; documented the methodology in a public article.
- React Native Skia List | Creator** **Oct 2024**
- Built a Skia/C++ virtualized list that rendered 1,000 items up to 10x faster than existing React Native list-rendering solutions with about 70% fewer dropped frames; 240+ GitHub stars.
- Browser Fingerprinting Technical Analysis | Author** **May 2024**
- Authored a FingerprintJS-based technical analysis; developed a custom fingerprinting library and dataset to evaluate identification methods, limitations, and countermeasures.
- Missing Native JS Syntax | Creator and maintainer - TypeScript tooling** **Jul 2023**
- Created a TypeScript transformer and Babel plugin that adds missing JavaScript syntax patterns to existing codebases.
 - Packaged the tool for npm with documentation, examples, and automated CI, demonstrating compiler-tooling and developer-experience work.
- Baileys & WhatsApp Messaging Stack (private) | Creator - messaging protocol infrastructure** **Apr 2023**
- Extended a private WhatsApp-compatible messaging stack with native-mobile API support, TCP transport, registration flows, media mappings, and device/session events.
 - Built the associated operations backend and dashboard with account authentication, APNs integration, proxy handling, API-key management, BullMQ jobs, structured logging, and performance-focused data flows.
- Pokémon-inspired 2D Game | Creator - Java game development** **Feb 2021**
- Built a complete 2D game in Java with the LITengine framework, including game mechanics, assets, and a distributable release.
 - Applied object-oriented design and game-engine development in an independently shipped personal project.

PROJECTS (CONTINUED)

Puppeteer Stream | Creator & Maintainer

Dec 2020

- Created and maintains a TypeScript browser audio/video capture library for Puppeteer with 222k+ npm downloads in the 12 months ending August 2026, 459+ GitHub stars, and 131 forks.

Carcassonne AI | Creator - AI and game-systems project

Nov 2020

- Designed and implemented an AI for the board game Carcassonne as a school seminar project, supported by a technical paper and playable implementation.
- Explored search and decision-making techniques alongside Python game logic and a visual game interface.

Discord Bot Client | Creator

May 2020

- Created a Discord client fork with bot-login support, exposing a bot-oriented client experience that the official application did not provide.
- Built and maintained a widely adopted open-source project with 695 GitHub stars, 390 forks, and 908,716 downloads across its ten published installers.

GyKi Mobile App | Creator - iOS school companion

2018

- Built a native iOS app for the Gymnasium Kirchheim community, giving students mobile access to timetables and substitution plans.

TECHNICAL SKILLS

Primary: TypeScript, JavaScript, React, Next.js, React Native, Node.js/Bun

Backend & delivery: PostgreSQL, GraphQL, WebSocket/WebRTC, Docker, Linux, Playwright, CI/CD, Go

Mobile & performance: Skia, Reanimated, JSI/Hermes, iOS/Android, C++, Rust, WebGL/FFmpeg

EDUCATION

Technical University of Munich (TUM) | Informatics studies (no degree) | 2022-2024

Gymnasium Kirchheim | Allgemeine Hochschulreife (Abitur), grade 1.9 | 2022
